

The Angelina & Neches River Authority (ANRA), located in Lufkin, TX, is looking to hire an experienced Quality Assurance Officer to join our team. This interdisciplinary position will be a part of our Environmental Division and work closely with the Laboratory and Clean Rivers Program teams.

The successful candidate will serve as the Quality Assurance Officer for a NELAP-accredited laboratory performing drinking water, wastewater, and surface water analyses. Responsibilities for the Quality Assurance Officer will include writing, reviewing, and approving standard operating procedures and other quality documents, conducting internal audits, performing/documenting/monitoring corrective actions, and other quality assurance/quality control tasks necessary for the operation of an accredited laboratory.

This position will also be responsible for leading ANRA's surface water quality monitoring program. Duties for this role will include the conducting of water quality field measurements and collection of water samples. This person will also be tasked with Quality Assurance Officer responsibilities for this program, including the preparation of Quality Assurance Project Plans and the review of laboratory data. This person will also assist in public outreach activities and the preparation of water quality reports.

This position will include both office and field work.

The successful candidate will have at a minimum a Bachelor's degree in chemistry, biology, ecology, and/or environmental science (or equivalent), with at least sixteen (16) college credit hours in chemistry. A minimum of three (3) years' experience is also required.
