

**Position Announcement: Water Resources Engineer**

Ecosystem Planning and Restoration, LLC, (EPR) has an open position for a full-time Water Resources Engineer in our Houston, TX office. EPR specializes in ecosystem restoration and mitigation, environmental studies, permitting, and watershed studies. We are a growing firm with East Coast and Gulf Coast locations, and are actively looking for motivated, high quality individuals to help build our business.

Qualified Water Resources Engineer candidates will hold an engineering degree and have at least 3 years direct experience in ecosystem restoration and mitigation projects, stormwater management, and construction phases services. Experience should include existing condition assessments, development of conceptual and final design components, report writing, client interface, hydraulic analyses, and permitting. Preferred candidates will be self-motivated, be able to show detailed experience leading ecosystem restoration tasks and/or projects, have a thorough understanding of hydraulics and hydrology, and work well in a team setting. Must be willing to travel. Duties will include working with senior engineers and project managers to assist with restoration designs, developing hydrologic and hydraulic models, data collection, and field assessments. Licensure as an Engineering Intern (EI) or Professional Engineer (PE) is preferred .

Benefits include health insurance, 401K with company match, employee bonus plan, vacation and sick leave, and continuing education training. Salary commensurate with experience and abilities.

Please Send Resume and Cover Letter to:

Mr. Sonny Kaiser, 17442 North Eldridge Parkway, Tomball, TX 77377
